Units Rehabilitated-Single Units	0
Units Rehabilitated-Multi Unit Housing	0

Funds Leveraged for Activities Completed \$0.00

Notes

1 Also, additional funds may have been available from prior years.

2 The return of grant funds is not reflected in these expenditures.

3 Derived by dividing annual expenditures for low-and moderate-income activities by the total expenditures for all activities (excluding planning and administration, except when State planning activities have a national objective) during the program year.

4 For entitlement communities, these data are only for those activities that directly benefit low- and moderate-income persons or households. They do not include data for activities that provide assistance to low- and moderate-income persons on an area basis, activities that aid in the prevention and elimination of slums and blight, and activities that address urgent needs. For states, these data are reported for all activities that benefit low- and moderate-income persons or households, aid in the prevention and elimination of slums and blight, and address urgent needs.

5 This number represents the total number of persons/households for whom services/facilities were available for [in many cases] multiple area benefit activities as reported by grantees. A service or facility meeting the national objective of benefiting low- and moderate-income persons on an area basis is available to all residents of the area served by the activity. If one or more activities had the same or overlapping service areas, the number of persons served by each activity was used to calculate the total number served; e.g., if two activities providing different services had the same service area, the number of persons in the service area would be counted twice; once for each activity.

Units Rehabilitated-Single Units	30
Units Rehabilitated-Multi Unit Housing	0

Funds Leveraged for Activities Completed \$308,347.99

Notes

1 Also, additional funds may have been available from prior years.

2 The return of grant funds is not reflected in these expenditures.

3 Derived by dividing annual expenditures for low-and moderate-income activities by the total expenditures for all activities (excluding planning and administration, except when State planning activities have a national objective) during the program year.

4 For entitlement communities, these data are only for those activities that directly benefit low- and moderate-income persons or households. They do not include data for activities that provide assistance to low- and moderate-income persons on an area basis, activities that aid in the prevention and elimination of slums and blight, and activities that address urgent needs. For states, these data are reported for all activities that benefit low- and moderate-income persons or households, aid in the prevention and elimination of slums and blight, and address urgent needs.

5 This number represents the total number of persons/households for whom services/facilities were available for [in many cases] multiple area benefit activities as reported by grantees. A service or facility meeting the national objective of benefiting low- and moderate-income persons on an area basis is available to all residents of the area served by the activity. If one or more activities had the same or overlapping service areas, the number of persons served by each activity was used to calculate the total number served; e.g., if two activities providing different services had the same service area, the number of persons in the service area would be counted twice; once for each activity.

Units Rehabilitated-Single Units	0
Units Rehabilitated-Multi Unit Housing	0

Funds Leveraged for Activities Completed \$0.00

Notes

1 Also, additional funds may have been available from prior years.

2 The return of grant funds is not reflected in these expenditures.

3 Derived by dividing annual expenditures for low-and moderate-income activities by the total expenditures for all activities (excluding planning and administration, except when State planning activities have a national objective) during the program year.

4 For entitlement communities, these data are only for those activities that directly benefit low- and moderate-income persons or households. They do not include data for activities that provide assistance to low- and moderate-income persons on an area basis, activities that aid in the prevention and elimination of slums and blight, and activities that address urgent needs. For states, these data are reported for all activities that benefit low- and moderate-income persons or households, aid in the prevention and elimination of slums and blight, and address urgent needs.

5 This number represents the total number of persons/households for whom services/facilities were available for [in many cases] multiple area benefit activities as reported by grantees. A service or facility meeting the national objective of benefiting low- and moderate-income persons on an area basis is available to all residents of the area served by the activity. If one or more activities had the same or overlapping service areas, the number of persons served by each activity was used to calculate the total number served; e.g., if two activities providing different services had the same service area, the number of persons in the service area would be counted twice; once for each activity.

Units Rehabilitated-Single Units	0
Units Rehabilitated-Multi Unit Housing	0

Funds Leveraged for Activities Completed \$220,734.05

Notes

1 Also, additional funds may have been available from prior years.

2 The return of grant funds is not reflected in these expenditures.

3 Derived by dividing annual expenditures for low-and moderate-income activities by the total expenditures for all activities (excluding planning and administration, except when State planning activities have a national objective) during the program year.

4 For entitlement communities, these data are only for those activities that directly benefit low- and moderate-income persons or households. They do not include data for activities that provide assistance to low- and moderate-income persons on an area basis, activities that aid in the prevention and elimination of slums and blight, and activities that address urgent needs. For states, these data are reported for all activities that benefit low- and moderate-income persons or households, aid in the prevention and elimination of slums and blight, and address urgent needs.

5 This number represents the total number of persons/households for whom services/facilities were available for [in many cases] multiple area benefit activities as reported by grantees. A service or facility meeting the national objective of benefiting low- and moderate-income persons on an area basis is available to all residents of the area served by the activity. If one or more activities had the same or overlapping service areas, the number of persons served by each activity was used to calculate the total number served; e.g., if two activities providing different services had the same service area, the number of persons in the service area would be counted twice; once for each activity.

Units Rehabilitated-Single Units	9
Units Rehabilitated-Multi Unit Housing	2

Funds Leveraged for Activities Completed \$1,025,605.04

Notes

1 Also, additional funds may have been available from prior years.

2 The return of grant funds is not reflected in these expenditures.

3 Derived by dividing annual expenditures for low-and moderate-income activities by the total expenditures for all activities (excluding planning and administration, except when State planning activities have a national objective) during the program year.

4 For entitlement communities, these data are only for those activities that directly benefit low- and moderate-income persons or households. They do not include data for activities that provide assistance to low- and moderate-income persons on an area basis, activities that aid in the prevention and elimination of slums and blight, and activities that address urgent needs. For states, these data are reported for all activities that benefit low- and moderate-income persons or households, aid in the prevention and elimination of slums and blight, and address urgent needs.

5 This number represents the total number of persons/households for whom services/facilities were available for [in many cases] multiple area benefit activities as reported by grantees. A service or facility meeting the national objective of benefiting low- and moderate-income persons on an area basis is available to all residents of the area served by the activity. If one or more activities had the same or overlapping service areas, the number of persons served by each activity was used to calculate the total number served; e.g., if two activities providing different services had the same service area, the number of persons in the service area would be counted twice; once for each activity.

Persons for Whom Services and Facilities were Available	15,938 ⁵
Units Rehabilitated-Single Units	0
Units Rehabilitated-Multi Unit Housing	0

Funds Leveraged for Activities Completed \$3,762.26

Notes

1 Also, additional funds may have been available from prior years.

2 The return of grant funds is not reflected in these expenditures.

3 Derived by dividing annual expenditures for low-and moderate-income activities by the total expenditures for all activities (excluding planning and administration, except when State planning activities have a national objective) during the program year.

4 For entitlement communities, these data are only for those activities that directly benefit low- and moderate-income persons or households. They do not include data for activities that provide assistance to low- and moderate-income persons on an area basis, activities that aid in the prevention and elimination of slums and blight, and activities that address urgent needs. For states, these data are reported for all activities that benefit low- and moderate-income persons or households, aid in the prevention and elimination of slums and blight, and address urgent needs.

5 This number represents the total number of persons/households for whom services/facilities were available for [in many cases] multiple area benefit activities as reported by grantees. A service or facility meeting the national objective of benefiting low- and moderate-income persons on an area basis is available to all residents of the area served by the activity. If one or more activities had the same or overlapping service areas, the number of persons served by each activity was used to calculate the total number served; e.g., if two activities providing different services had the same service area, the number of persons in the service area would be counted twice; once for each activity.

Funds Leveraged for Activities Completed \$168,787.57

Notes

1 Also, additional funds may have been available from prior years.

2 The return of grant funds is not reflected in these expenditures.

3 Derived by dividing annual expenditures for low-and moderate-income activities by the total expenditures for all activities (excluding planning and administration, except when State planning activities have a national objective) during the program year.

4 For entitlement communities, these data are only for those activities that directly benefit low- and moderate-income persons or households. They do not include data for activities that provide assistance to low- and moderate-income persons on an area basis, activities that aid in the prevention and elimination of slums and blight, and activities that address urgent needs. For states, these data are reported for all activities that benefit low- and moderate-income persons or households, aid in the prevention and elimination of slums and blight, and address urgent needs.

5 This number represents the total number of persons/households for whom services/facilities were available for [in many cases] multiple area benefit activities as reported by grantees. A service or facility meeting the national objective of benefiting low- and moderate-income persons on an area basis is available to all residents of the area served by the activity. If one or more activities had the same or overlapping service areas, the number of persons served by each activity was used to calculate the total number served; e.g., if two activities providing different services had the same service area, the number of persons in the service area would be counted twice; once for each activity.

Units Rehabilitated-Single Units	0
Units Rehabilitated-Multi Unit Housing	0

Funds Leveraged for Activities Completed \$741,669.46

Notes

1 Also, additional funds may have been available from prior years.

2 The return of grant funds is not reflected in these expenditures.

3 Derived by dividing annual expenditures for low-and moderate-income activities by the total expenditures for all activities (excluding planning and administration, except when State planning activities have a national objective) during the program year.

4 For entitlement communities, these data are only for those activities that directly benefit low- and moderate-income persons or households. They do not include data for activities that provide assistance to low- and moderate-income persons on an area basis, activities that aid in the prevention and elimination of slums and blight, and activities that address urgent needs. For states, these data are reported for all activities that benefit low- and moderate-income persons or households, aid in the prevention and elimination of slums and blight, and address urgent needs.

5 This number represents the total number of persons/households for whom services/facilities were available for [in many cases] multiple area benefit activities as reported by grantees. A service or facility meeting the national objective of benefiting low- and moderate-income persons on an area basis is available to all residents of the area served by the activity. If one or more activities had the same or overlapping service areas, the number of persons served by each activity was used to calculate the total number served; e.g., if two activities providing different services had the same service area, the number of persons in the service area would be counted twice; once for each activity.

Persons for Whom Services and Facilities were Available	68,187 ⁵
Units Rehabilitated-Single Units	453
Units Rehabilitated-Multi Unit Housing	26

Funds Leveraged for Activities Completed \$6,983,962.57

Notes

1 Also, additional funds may have been available from prior years.

2 The return of grant funds is not reflected in these expenditures.

3 Derived by dividing annual expenditures for low-and moderate-income activities by the total expenditures for all activities (excluding planning and administration, except when State planning activities have a national objective) during the program year.

4 For entitlement communities, these data are only for those activities that directly benefit low- and moderate-income persons or households. They do not include data for activities that provide assistance to low- and moderate-income persons on an area basis, activities that aid in the prevention and elimination of slums and blight, and activities that address urgent needs. For states, these data are reported for all activities that benefit low- and moderate-income persons or households, aid in the prevention and elimination of slums and blight, and address urgent needs.

5 This number represents the total number of persons/households for whom services/facilities were available for [in many cases] multiple area benefit activities as reported by grantees. A service or facility meeting the national objective of benefiting low- and moderate-income persons on an area basis is available to all residents of the area served by the activity. If one or more activities had the same or overlapping service areas, the number of persons served by each activity was used to calculate the total number served; e.g., if two activities providing different services had the same service area, the number of persons in the service area would be counted twice; once for each activity.
