

CHAPTER 9. NEIGHBORHOOD STANDARDS

- 9-1. LAND DEVELOPMENT WITH CONTROLLED EARTHWORK. Land Development of controlled earthwork is defined in Reference (1) of the Foreword as individual properties and developments on land that has been or will be filled to such an extent that:
- a. The building footings or foundations are to be placed on filled ground or
 - b. The floor slabs are to be placed on fill in excess of that permitted by the Minimum Property Standards.
- 9-2. STREET IMPROVEMENT STANDARDS. Field Land Planning personnel should keep in close touch with leaders of communities which are active in HUD-FHA programs in order to improve and upgrade the quality and functions of street improvements.
