[DESCRIPTION](#) | [COMMUNITY WIDE IMPACT](#)

ADDRESS: ; New Orleans, LA AREA: CBD

TARGET START DATE: 07/01/2006 **DURATION:** 18 Months

Current Status	Effective Date	Comments
Under Development	04/07/2006	

DESCRIPTION:

The City of New Orleans had been a major tourist attraction for admirers of historic architecture, unique food and cultural celebrations---reviving these community assets is critical to economic development activity. A major thoroughfare for tourism is along the Canal Street Corridor which spans approximately 1.6 miles within the Central Business District (CBD). Approximately 10,000 hotel rooms, 3,000 of which were in the CBD, have been placed out of service as a result of the storms; directly related to the loss in hotel availability is the significant decrease in convention bookings with the New Orleans Convention & Visitors Bureau reporting FY 2007, 2008 and 2009 bookings at 138, 88 and 54, respectively. In 2004 the NOCVB reported that it hosted 953 conventions. As of July 2005, there had been 885 conventions. Leisure and Hospitality, the major economic driver accounting for 40% of total employment in Orleans Parish and 30% of local revenues pre-disaster, needs to be restored by comprehensive improvements along Canal Street including streetscape, mixed-income housing, mixed-use developments, parking, upscale retail and employment opportunities. These improvements will strengthen tourism as an economic development activity by increasing foot traffic along the corridor, thereby increasing revenues for recycled use within the CBD for maintenance of the tourist attractions along Canal Street.

As part of the Canal Street Development Strategy, the below mentioned projects will revitalize the Canal Street Corridor, known as the anchor of the New Orleans hospitality industry. The revitalization efforts will be focused on upgrading the retail mix of small businesses along Canal Street through business retention and recruitment activities, conducting a feasibility study of 1 million square feet of upper floor vacant space for potential residential and mixed-used developments, recruitment of businesses to the corridor from outlying areas to occupy vacant ground floor space, streetscaping and physical infrastructure improvements, and the creation of a world-class entertainment district. Also, a study of parking expansion opportunities will be conducted to support the new improvements. All of these improvements, including more parking in the Central Business District, are intended to restore the cultural attractiveness of the Canal Street Corridor as a key generator of tourism revenues
