Subject: HUD - HCS Operates Best Using IE 7

We completed analysis for HCS F11 Windows 7/ IE 8 migration testing. Overall testing results exceeded our expectations. We found that HCS application is more stable and has less error than we expected. Since HUD has moved to the IE 7 version and HCS was modified to operate best on this platform, it is advised that you upgrade your Windows IE to 7 to get the most out of HCS performance.

Direct your questions and comments to your HUD POC.

Thanks,
George Grotheer
HUD - HCS Project Manager.
